Understanding Your Risk for Hereditary Cancer

Tuesday, November 10 from 5:30 to 7 p.m.

Featured Speaker: Melanie Baxter, ScM, Genetics Counselor

Hereditary cancer is a cancer risk that is passed on in a family and results from an abnormal alteration in a single gene. Now there are tests that can reveal possible hereditary predispositions to certain cancers. Join us for an informative evening about the latest advancements in cancer risk assessment and genetic testing that may be helpful when making medical decisions about how to manage your risk for cancer.

Free Prostate Cancer Screening

Thursday, November 12 from 7 to 9:30 a.m. and 4 to 6:30 p.m.

Free PSA screenings (blood draw only). Those eligible for this screening are men 45 and older, men 40 and older with a family history, African-American males 40 and older, men who have not had a PSA drawn in the last year and are not currently being treated for prostate cancer. Pre-registration is encouraged but walk-ins will be accepted based on availability.

Edward Jones Family YMCA
12521 Marine Avenue • St. Louis, MO 63146

To register for these free events, please call the Siteman Cancer Center
